Speak Distinctly

When using the telephone speak distinctly, with lips not more than one inch from the mouthpiece. It is unnecessary to shout.

ILLINOIS BELL TELEPHONE COMPANY

Oh--wun--fo-wer--siks

siks--too--oh--sev-ven

fi-yiv--ate--ni-yen--oh

fo-wer--th-r-ee--ate--wun

TRY pronouncing the odd little syllables printed above. You will find they sound (and unmistakably) like well-known numbers you use every day.

Now, these words didn't just happen! It was found that several numbers sound much alike over the telephone so careful speech tests were made to find the simplest and surest sounds for the numerals 0 and 9.

Here they are in order: oh (0) . . . wun (1) . . . too (2) . . . th-r-ee (3) . . . fo-wer (4) . . . fi-yiv (5) . . . siks (6) . . . sev-ven (7) . . . ate (8) . . . ni-yen (9).

Illinois Bell telephone operators are trained to speak this way because this is the best way to identify numbers with the least chance of error.

Your telephone company aims to give you the finest possible service at the lowest possible cost.

ILLINOIS BELL TELEPHONE COMPANY

Give The Person You Call Time to Answer

Time passes slowly when you are waiting at the telephone for some one to answer your call. A few seconds may seem like a couple of minutes.

When you make a telephone call give the person you are calling plenty of time to answer. He may be far from the telephone or may not have heard it ring the first time. He may have been delayed in answering.

By waiting a short time you may save yourself the trouble of calling again.

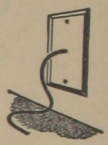
ILLINOIS BELL TELEPHONE COMPANY

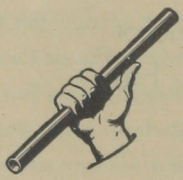
For That Home-To-Be...

PLANNED TELEPHONE SERVICE!

Telephone service . . . like gas, water and electrical facilities . . . should be planned in advance. Telephone wiring can be as modern and inconspicuous as plumbing and electrical work if *provisions for it are made before your home is built.*

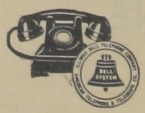
Concealed wiring through the use of rigid, flexible or thinwall conduit, enables you to have *built-in telephone outlets* . . . neat little plates which assure preferred telephone instrument locations and which will add much to the living comfort and convenience of your home-to-be.





Conduit placed in walls and floors by the contractor at the time of construction eliminates exposed wiring on baseboards and moldings and reduces the possibility of interruptions to your telephone service. Costs are nominal. Remember, the telephone company provides all needed wires and wiring work—you merely have the conduit installed.

Your telephone company will be glad to consult with you *without cost or obligation* and make recommendations for built-in conduit. Just call our business office and ask for "Architects' and Builders' Service."



ARCHITECTS, CONTRACTORS AND BUILDERS ARE INVITED TO CALL UPON US FOR ASSISTANCE IN PLANNING TELEPHONE FACILITIES.

Useful Information and Items of Interest

about

HAMMOND and CALUMET CITY

Hammond, formerly known as State Line, is situated in Lake County, Indiana, in the northwestern part of the State and directly adjacent to Chicago's eastern limits.

In 1868 George Hammond, in whose honor the city was later renamed, located his packing industry in this territory and was instrumental in the community's early development. The city charter was secured in 1873 and Hammond's growth as an important packing center was rapid. The beginning of the twentieth century, however, saw the meat packing business largely replaced by numerous diversified industries seeking to locate in a region that offered excellent transportation facilities by rail and water and an accessibility to markets and raw materials.

Since 1900, Hammond has become one of the important centers for bookbinding and the manufacture of railroad equipment. Situated as it is, in the heart of the Calumet industrial region, its destiny and continued growth are assured.

Calumet City is located to the west of Hammond, in Cook County, Illinois. Because of its proximity to Hammond, it is economically a part of that city. The major industries in Calumet City are chemical and fertilizer manufacturers.

Burnham is located on the south limits of the city of Chicago, North and West of Calumet City and Hammond, respectively and is a community of homes.

Third Class: Articles weighing not more than eight ounces. Miscellaneous, 2c for first two ounces plus 1c for each additional ounce. Books, seeds, catalogs, etc., 1½c for each two ounces or fraction thereof.

Fourth Class: Parcel Post. Third Class articles over eight ounces and all mailable matter not included in First, Second or Third Class. Rates on Parcel Post vary with weight and mileage.

Patrons are urged to address mail completely, spell state names in full and to show return address on all matter. If in haste, use Air Mail or Special Delivery.

Features are the fine swimming pools which also serve as hockey and skating rinks in the winter time, and the $600,000.00 Civic Center development which provides facilities for large community activities and winter in-door recreation.

A memorial park is located in **Calumet City** and Wicker Park, a memorial to Lake County's war dead, is situated just outside the south limits of the city.

Transportation

Hammond is served by several large railroads operating freight and passenger service, including the Erie, Monon, South Shore, Michigan Central, New York Central, Nickel Plate, Pennsylvania and Wabash railroads. There are also four belt lines serving the industrial district while frequent interurban passenger service is maintained between all cities of the Calumet Region. Excellent motor coach service by the larger bus lines is available to all points.

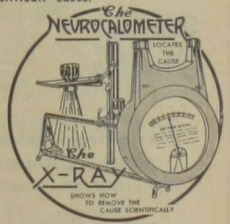
DR. WARREN S. HAMEL, D. C.
SPECIFIC STRAIGHT HOLE-IN-ONE
CHIROPRACTOR
"Nominal Fee For Consultation"
Our aim is to render up-to-the-minute Scientific and Specific Chiropractic Health Service. The Neurocalometer and X-Ray enables us to get the worst cases better in shorter Time. The Neurocalometer shows us where to adjust, and when to adjust, and when not to adjust. We are interested in chronic problem, stubborn, and difficult cases.

The Specific Advanced Hole-in-one Health Service Technique Is No Guesswork



DO NOT BE MISLED!
THREE VITAL QUESTIONS
1st — Where is the *LOCATION*? The Neurocalometer *PROVES*.
2nd — *WHAT* is the *POSITION* of the subluxation? The X-Ray *PROVES*.
3rd — The adjustment corrects position and releases pressure. *HEALTH* is the result. *LOCATION* and *POSITION* — both are vitally essential. The Neurocalometer establishes *LOCATION*. The X-Ray establishes *Position*. *BOTH* are vitally essential. Neither one does the work of the other.
Hours 10 A.M. to 2 P.M. — 3 P.M. to 8 P.M.
